

COMPUTING FUNDAMENTALS

Lecture No : 1

16-11-12

Computing Fundamentals

- ▶ Course Instructor:

- Dr. Adnan Habib

- ▶ Lab Engineer:

- Engr. Mehak Arshad

- ▶ Online Course Content:

- CMS (Course Management System)

Grading Criteria

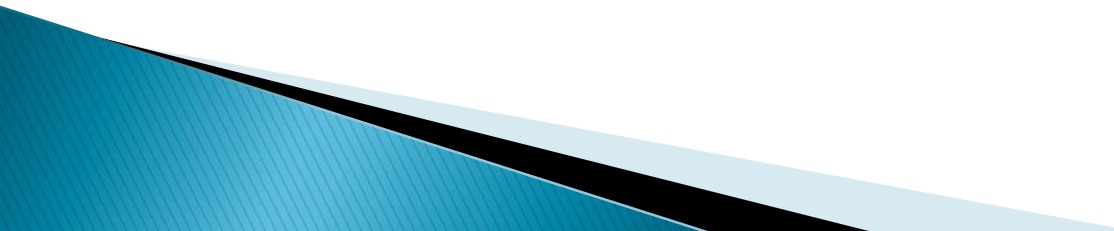

▶ Assignments	15
▶ Quizzes	10
▶ Lab	
• Lab Task	10
• Project	5
▶ Mid Semester Exams	20
▶ Final Exams	40

Course Book

- ▶ Introduction to Computers
 - By: **PETER NORTON**
 - 7th Edition

Goal of the Course

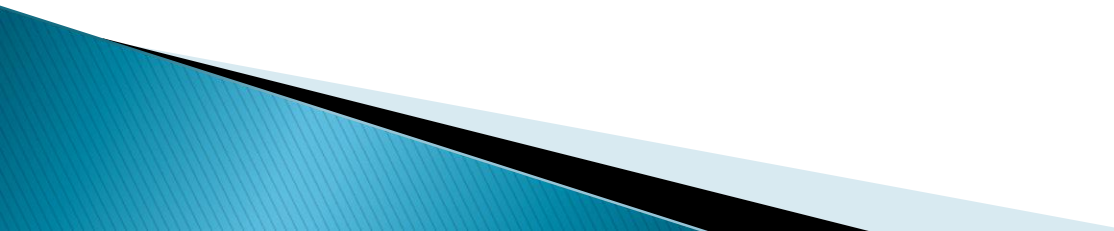

- ▶ An understanding of role computation can play in solving problems.
 - ▶ Get an idea of development especially web.
 - ▶ Get the basic idea of Databases for the storage of records.
- 

Course Contents

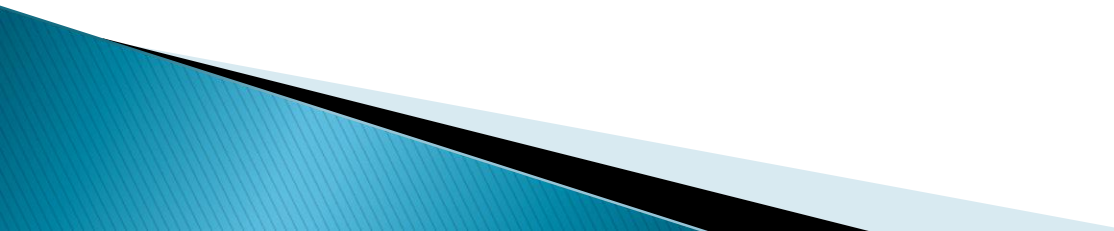

- ▶ Introduction to Computer Systems
- ▶ Processing Data
- ▶ Storing Data
- ▶ Operating Systems
- ▶ Network
- ▶ Internet
- ▶ Working with online Applications
- ▶ Working with Application Software's
- ▶ Database Management
- ▶ Software Programming

Computer Engineering

- ▶ Combination of “*Electrical Engineering*” and “*Computer Science*”.
 - ▶ Fields covered in this engineering are:
 - Embedded Systems
 - Databases
 - Web Development
 - Java Development
 - Networking
 - Programming Languages
- 

What is a Computer

- ▶ A computer is an electronic device that process data, converting it into information that is useful to people.
 - ▶ A computer is controlled by the programmed instructions, which give the machine a purpose and tell what to do.
- 

What is a Computer

Computer

- ▶ It converts data into information
- ▶ Modern computers are digital
 - Two digits combine to make data
- ▶ Older computers were analog
 - A range of values made data

Computers are Everywhere

Games

Hospital

Military

Business

Education

Mobile

Computers in Daily Life

Parts of Computer

- ▶ Hardware
- ▶ Software
- ▶ Data
- ▶ User

Hardware

- ▶ Components that are touchable or have some physical existence
 - Input and Output devices
 - Processor
 - Memory
 - Storage devices

Keyboard

Mouse

Output Devices

Storage Devices

Processor

ROM

RAM

Software

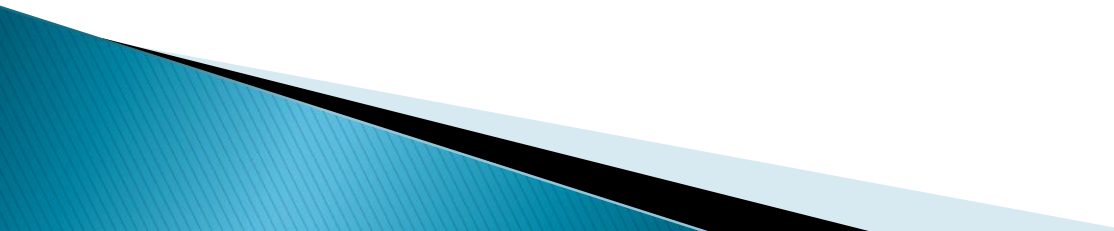

- ▶ Set of instructions that tell a system what to do.
 - Application Software
 - System Software

Device Drivers are System or Application Software

Data

- ▶ The material provided to the device for processing and produce a useful information is called “Data.”
 - ▶ Basically the input part provides Data to the system.
 - ▶ It can be of any type: text, voice, pointer movement etc
- 

Users

- ▶ The people who interact with the system are “Users”.
- ▶ We usually instruct according to the requirement of the user, so the users are the most important factor in building a system.

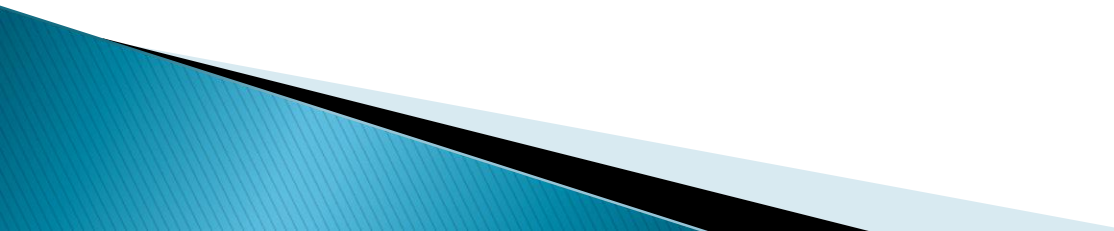

Processing Cycle

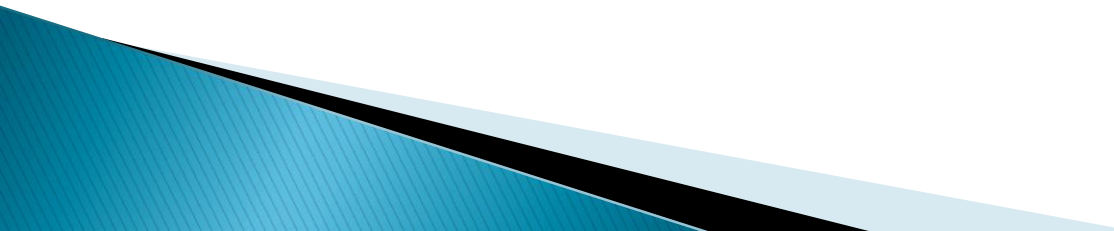

Processing Cycle

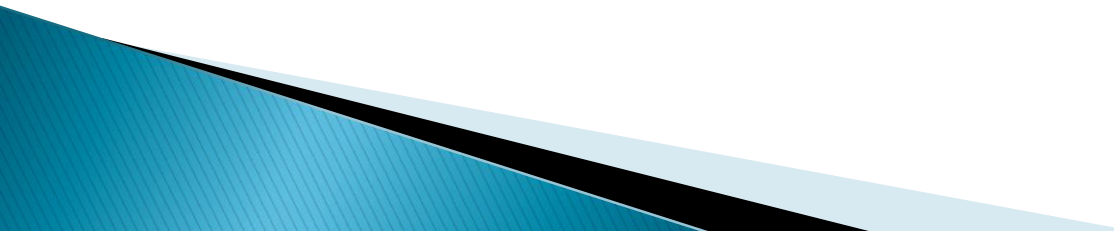

Computers for Individual Users

- ▶ Desktop Computers
 - ▶ Workstations
 - ▶ Notebook Computers
 - ▶ Tablet Computers
 - ▶ Handheld Computers
 - ▶ Smart Phones
- 

Personal Computers

- ▶ Any computer system that is designed for use by a single person.
 - ▶ Also known as “**Microcomputers**”.
 - ▶ Among the smallest computer created for people.
 - ▶ Previously mentioned all systems are Personal Computers (PC).
- 

Desktop Computers

- ▶ A PC that is designed to sit on a desk or table.
 - ▶ Mostly used in school, homes and offices.
 - ▶ People do their job with greater ease and efficiency but they can be used to communicate, produce music, edit photographs and videos, play games and much more.
- 

Desktop Computers

Old Desktop Computers

Latest Desktop Computers

Workstations

- ▶ Specialized computers
- ▶ Optimized for science or graphics
- ▶ More powerful than a desktop

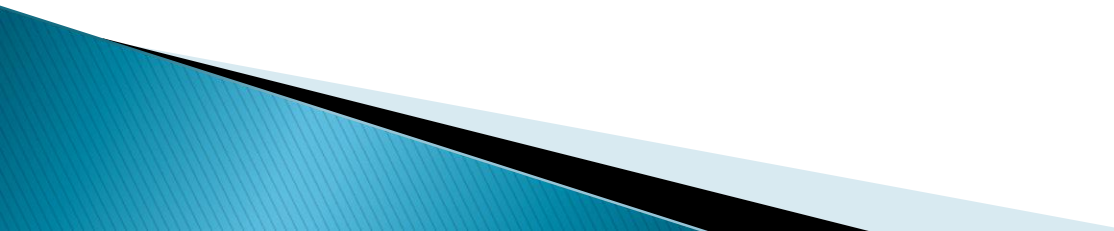

In 1990s

Today's

Notebook Computers

- ▶ Small portable computers
 - ▶ Weighs between 3 and 8 pounds
 - ▶ About 8 ½ by 11 inches
 - ▶ Typically as powerful as a desktop
- 

Notebook Computers

Tablet Computers

- ▶ Newest development in portable computers
- ▶ Input is through a pen (stylus)
- ▶ Run specialized versions of office products

Handheld Computers

- ▶ Small enough to fit on hand
- ▶ Personal Digital Assistant (PDAs)
- ▶ Used for taking notes, addresses and agendas.

Smartphones

- ▶ Some cellular phones offer advanced features that is usually not found in mobiles.
- ▶ Like Web and email access
- ▶ Special software and hardware

Why Computers are so Important

Why Computers are so Important

- ▶ They provide
 - Rapid calculations
 - Data storage
 - Worldwide communications
 - Accuracy
 - Less time consuming

Assignment # 01

- ▶ **Statement:**

Write short note on the history of the computers from start to present?

- ▶ **Submission Date :**

23-11-2012

- ▶ **Hard Copy within the folder.**
