Dr. Afshan Jamil

Ufone

PTML is a wholly owned subsidiary of Pakistan Telecommunication Company Limited. Following PTCL's privatization, Ufone became a part of the Etisalat in 2006. Ufone is the smallest GSM mobile service provider and least number mobile service in terms of subscriber base of 18 million.[3] It has a market share of 13%, least among all four mobile operators. Ufone has appointed Rashid Khan as its new CEO replacing Mr. Rainer Rathgeber who only worked at the company for 18 months. Rashid was the CEO of Mobilink (now Jazz) from 2008 to 2014. The company commenced its operations, under the brand name of Ufone, from Islamabad on January 29, 2001. Ufone became a part of the Emirates Telecommunication Corporation Group (Etisalat) in 2006. Ufone had bid on a 5MHz block of 2100 MHz spectrum in the NGMS auction held in early 2014, however due to rising demand and lack of bandwidth to keep up, in December 2016, Ufone decided to re-farm a portion of its 900 MHz 2G network to 3G (HSPA+), and is now offering 3G over two frequencies to deal with the increasing load on the network. Ufone has only re-farmed their 900 MHz spectrum in Karachi, Lahore, Rawalpindi/Islamabad, Abbotabad, Sheikhpura and Sialkot

Aurora Solutions

We specialize in building server backends designed to be scalable, performant, secure and reliable. These backends can either be for independent web services or batch servers, or work in combination with a web or mobile frontend. We have expertise in the following technologies: Our team has experience working with Cryptocurrency platforms such as Bitcoin, Ethereum and Blockchain. Being a recent technology, clients sometimes face challenges understanding the use cases as well as technology requirements of these platforms. With our team's expertise in both domain and technology, we can help clients develop their systems such as Crypto-currency Exchanges, Wallets, Merchant services, or other platforms. We have expertise in the following technologies: For rapid application development and delivery, any software development process is incomplete without a DevOps component. Our team can help to automate your cloud infrastructure and continuous integration and delivery, to make all your deployments partially or fully automated, thus avoiding the wastage of valuable time in each milestone lifecycle. We have expertise in the following technologies Pliro aims to bridge the gap between doctors and patients and serves thousands of users by providing a friendly platform web and mobile platform. Our goal is to revolutionize healthcare for average consumer in the third world countries by the use of intelligent technology. Pliro offers Practice management solution for private clinics and small hospitals as well as the convenience for patients to find and book medical appointments. Besides this we have a health blog and forum actively maintained for the ease of patients.
