What did you miss the most about UET Taxila ?

Everything, especially the time spent with my best buddies, and roaming inside the campus...UET ki shaamain Mujhe Apni Subha Say Ziada Pyaari Hain! - Whatever I am today is just because of UET.

Any message for Taxilian female students ?

Banday ko kaan ka itna kacha nai hona chahye aur apne bharam iitne oonchay nai rkhnay chahye k zameen per qadam he na rkhy ja rhy hon! *Lol JK*

Which thing of UET do you missed the most?

I miss everything about UET. I was the kind of guy who used to be very mischievous in the class and teachers used to throw me out of the lecture hall. Ah, loved those days. It was the golden era of my life indeed!

Waleed Arif Malik

I am that kind of person who is always in search of some activity and if I didn't manage to find anything, I create. No matter where I am or what I am doing, I try to do the best of my capabilities to make a difference for the greater good of people around me.

What was your secret recipe of leading UALS in an effective cool way?

There wasn't any secret recipe but I would share a few relevant things which I used to practice as President of the society. I believe in listening to everyone's opinions and taking out and adding things that I believe would make a difference for the cause but ultimately putting up the formulated idea in my way. This is the way I did it. Doing things your way without considering positive opinion from others basically draws the line between good governance and foolishness.

Farah Younas

How would you compare US education system with Pakistan education ?

In theory, both the US and Pakistani systems are essentially the same. The prime factor which differentiates between the two is the quality of the faculty and the resources that the Universities have. Faculty in the US Universities is extremely qualified and talented. Only those people who have a passion for teaching join the universities and this shows in the classrooms. Along with being exceptional teachers they are also very good researchers. The primary way in which research activities are funded in the US universities is through Industry- Government-University Partnership. So, you can say that the basic difference lies in the quality of teaching and the general resources that a university has at its disposal.

Describe yourself?

Where do I start? Hmm... I'm an easy-going and up-be at person who worries too much about little matters.

As far as my interests are concerned, I would go 'gaga' over football, movies are one thing that makes my time pass and music... Well music is the sigh relief for me in the free time. I will miss the morning tea and Aloo Walay Naan (the only survivable food for day scholars) at the university. Also, the endless hours spent with friends without actually doing anything that mattered. Yet it all mattered. One thing I will never forget is how the hostilities used to go mad over the lunch that I used to bring to the university. Moreover, one thing I'm sure of is having a footballer's celebration once I'm outta here; waiting for that moment. Soon IA.
